

Reports and Publications Overview

Below you will find an overview of the reports and publications on biodiversity related subjects in the Dutch Caribbean that have recently been published.

"Duvat, V. et al. (2018).

High human influence on beach response to tropical cyclones in small islands: Saint-Martin Island, Lesser Antilles. *Geomorphology*."

"Rocha et al. (2018).

Mesophotic coral ecosystems are threatened and ecologically distinct from shallow water reefs. *Science* 361: 281-284."

"Rivera-Milán, F.F., Simal, F., Bertuol, P., Boomer, G.S. (2018).

Population monitoring and modelling of yellow-shouldered parrot on Bonaire, Caribbean Netherlands. *Wildlife Biology*."

"Pavlowich, T., Webster, D.G., Kapuscinski, A.R. (2018).

Leveraging sex change in parrotfish to manage fished populations. *Elem Sci Anth* 6(1), p.63."

Student Reports

"Verschuur, J. (2018).

The impact of uncertain Antarctic ice sheet dynamics for future coastal erosion. A probabilistic approach for a data-scarce environment in the Caribbean. (case study St. Maarten)"

These reports and publications can be found in the Dutch Caribbean Biodiversity Database (DCBD) (<http://www.dcbd.nl>). The DCBD is a central online storage facility for all biodiversity and conservation related information in the Dutch Caribbean.

If you have research and monitoring data, the DCNA secretariat can help you to get it housed in the DCBD. Please e-mail us: research@DCNAnature.org
